

SK RAIHAN ALI

Data Science & Software Development | Python · ML · Web Dev
mrraihanxsk@gmail.com | +91 7076171016 | Kolkata, India | [GitHub](#) | [LeetCode](#)

CAREER OBJECTIVE

Aspiring Data Science and Software Development professional with strong skills in Python, Machine Learning, and Web Development. Seeking an opportunity to apply and enhance technical knowledge in a real-world environment while contributing meaningfully to impactful projects.

EDUCATION

B.Tech, Computer Science & Engineering (Data Science) 2023 – 2027
Brainware University, Kolkata
SGPA: 9.23 | **Average Percentage:** 85.43%

TECHNICAL SKILLS

Languages	Python, C, SQL
Web Development	Flask, Django, HTML, CSS, Bootstrap
Data Science / ML	NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
ML Algorithms	Linear & Logistic Regression, Decision Trees, Random Forest, Gradient Boosting
Databases	SQLite, MS SQL Server, SQLAlchemy
Tools & Platforms	Jupyter Notebook, Google Colab, GitHub, MS-Office, G Suite
Soft Skills	Problem Solving, Critical Thinking, Team Management, Active Learning, Time Management

PROJECTS

Flask Blog Web Application Sep 2025 – Oct 2025
Backend: Flask | DB: SQLite | Auth: Flask-Login | Frontend: HTML, CSS, Bootstrap

- Built a full-stack blog application featuring complete user authentication (register, login, session management) and profile management including photo uploads.
- Implemented CRUD operations for blog posts with dynamic content rendering using Jinja2 templates and SQLAlchemy ORM.
- Gained hands-on experience in backend logic, database integration, and scalable web application architecture.

TRAININGS & CERTIFICATIONS

Machine Learning Jul 2025 – Present
Udemy (Virtual)

- Supervised learning: Linear & Logistic Regression, Decision Trees, Random Forest, Gradient Boosting.
- Concepts include data preprocessing, feature engineering, bias-variance tradeoff, and performance metrics (accuracy, precision, recall, F1-score).
- Working with NumPy, Pandas, Matplotlib, and Scikit-learn on real-world datasets.

Django Feb 2026 – Present
Euphoria, New Town

- Hands-on with models, views, templates, CRUD operations, authentication, and ORM.
- Building web applications using Python and Django framework.

SQL

Nov 2025 – Present

Udemy (Virtual)

- Learning structured query language for database management and data retrieval.

Data Analytics

Apr 2025 – Present

Udemy (Virtual)

- Data cleaning, exploratory data analysis (EDA), and visualization with Matplotlib & Seaborn.
- Built projects involving real-world datasets to identify trends and generate actionable insights.

Flask

Aug 2025 – Sep 2025

Cursa (Virtual)

- Web development with authentication, CRUD operations, SQLAlchemy, and Flask-Login.
- Built a complete blog application with database integration and dynamic content management.

Python

Apr 2024 – Dec 2024

Brainware University, Barasat

- OOP, data handling, visualization, and libraries: NumPy, Pandas, Scikit-learn.

Data Structures & Algorithms

Mar 2024 – Feb 2026

Udemy (Virtual)

- Arrays, linked lists, stacks, queues, trees, sorting & searching techniques.
- Time and space complexity analysis with regular LeetCode problem-solving practice.

C Programming

Apr 2024 – Dec 2024

Online (Virtual)

- Control structures, pointers, recursion, arrays, strings, sorting algorithms, and file handling.

EXTRACURRICULAR ACTIVITIES

- Participated in Smart India Hackathon 2025 — worked on real-world problem-solving in a team environment.
- Built multiple personal projects including a Flask-based blog application and ML models.
- Regular participant in tech events and hackathons; actively contributing to GitHub with clean, documented code.
- Currently learning Machine Learning (Udemy) and Django (Euphoria) to deepen full-stack and AI capabilities.
